SCHOOL OF ENGINEERING

TIGER TEAM

- A TIGER TEAM is a specialized group that performs various assignments, stemming from their ability to complete these assignments on time and in an orderly manner.

- This summer at UConn, we are providing a labor service to assist in completing various tasks throughout the school of engineering departments such as moving supplies, painting, cleaning, taking inventory, and a variety of special requests.

- We are comprised of SOE students who are willing to get any and all jobs done in a timely, professional manner.
